

AEROSEEK

ANTI-DRONE SOLUTIONS

ABOUT AEROSEEK

Shenzhen Polaris Security Technology Co., Ltd. (Polaris Security) is a leading low-altitude drone security solution provider in China, committed to providing the world's best drone security guarantee products and solutions, and safeguarding airspace safety.

With years of experience, the company has rich comprehensive experience in anti-drone measures. Focused on technological innovation in drone safety, it is committed to researching and developing more portable and efficient drone prevention and control products.

The **Hobit series** products provide full types of anti-drone products, offering solutions for different application scenarios.

HOBIT D2 PRO

Portable UAV Detector

Key Features:

- High-performance directional antenna
 - Detection: 1.4Ghz-6Ghz
 - Identified and show UAV models
 - Build-in Screen shows detection & direction
 - Outstanding quality and reliability
 - Sound and vibration alerts
-
- Hobit D2 Pro is a portable UAV detection and direction finder system.
 - Drone detector Hobit D2 PRO has high-performance directional antenna, After the specified operation, Accurate drone bearings can be obtained.
 - It has outstanding battery performance which will backup up to 8 hours.

Detection
1500m

IP 55

8h

AEROSEEK

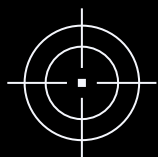

HOBIT D3 PRO

Portable FPV Detector

Key Features:

- High-performance directional antenna
 - Detection: 70Mhz-6Ghz
 - Identified and show UAV models
 - Build-in Screen shows detection & direction
 - Outstanding quality and reliability
 - Sound and vibration alerts
-
- Hobit D3 Pro is a portable UAV detection and direction finder system.
 - Can equipped with a high-performance directional antenna, it can obtain the accurate direction of the drone
 - Capable of recognizing DJI, Datong, FPV analog transmission, enhanced WiFi, LoRa, TBS ELRS, Lightbridge and etc.

Detection
5km

IP 65

8h

AEROSEEK

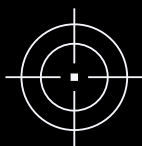

HOBIT P2 PRO

Counter-UAV Solution

Key Features:

- High performance directional antenna
 - Detection frequency 1.4GHz-6.0GHz
 - Jamming frequency 900Mhz, 1.2GHz, 1.5GHz, 2.4GHz, 5.2GHz, 5.8Ghz
 - Shield-shape design with ergonomics handle & Button
 - Build-in 3.5' Screen display system status
 - Dual mode, 'C2' and 'GNSS'
 - Detect and classified drones, show direction
-
- Hobit P2 Pro portable UAV detection system with multi-frequency strike.
 - Has High-performance detection antenna, After the specified operation, Accurate drone bearings can be obtained.
 - Shield Drone gun Hobit P2 Pro device supports two operating modes: "C2 mode" and "GNSS mode", which can be used simultaneously or separately.

Detection
1500m

Jamming
1500m

IP 55

1h/8h

AEROSEEK

HOBIT C1

Counter-UAV Portable Solution.

Key Features:

- Detection Range: 5km
 - Detection Bandwidth: 70Mhz-6Ghz
 - DroneID and RemoteID supported
 - Detection Qty: ≥ 20 drones (simultaneously)
 - Reliable Detection With High Accuracy (99%)
 - Size: 473*348*130mm
-
- **Accurate Identification:** Can detect over 400 drone models and frequency with accurate UAV model identification and unique electronic fingerprints.
 - **Full Detection Bandwidth:** Support 70Mhz-6Ghz drone singals, including FPV.
 - **Portable Design:** It comes in a suitcase form, making it highly portable and easy to carry around

6H

Detection
5-10 Km

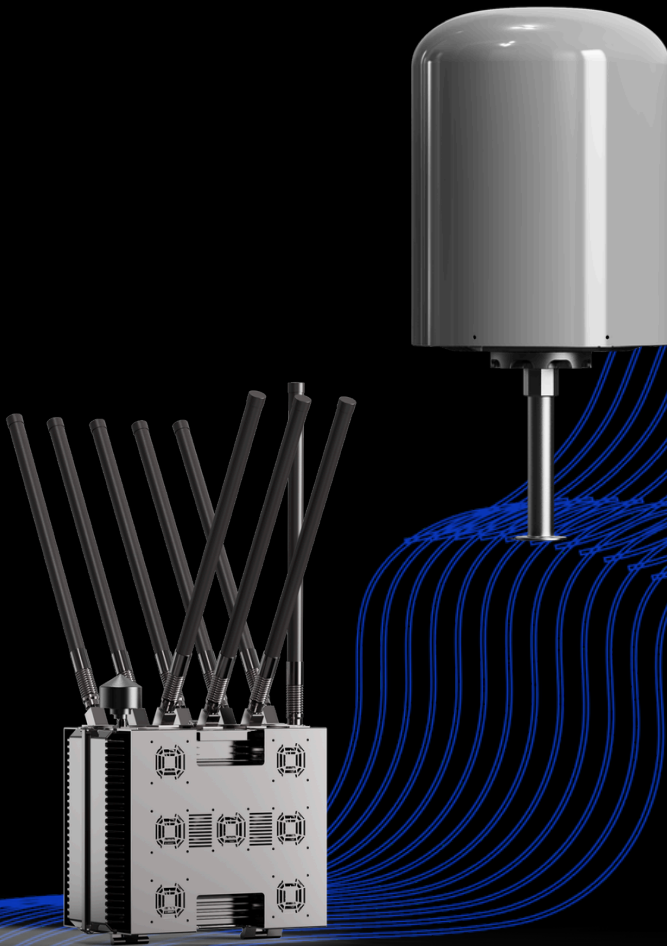

IP 65

AEROSEEK

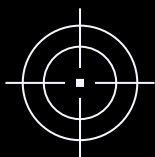

HOBIT S1 PRO

Counter-UAV Stationary Two-in-one Solution

Key Features:

- 10KM Detection Range
 - 70MHz-6GHz Frequency Supported
 - 300Mhz-6Ghz FPV analog signal detection
 - DroneID and RemoteID supported
 - High Accuracy Detection
 - Library over 400 Different Models
 - Jamming Frequency 800Mhz, 900Mhz, 1.2Ghz, 1.5Ghz, 2.4 Ghz, 5.2Ghz, 5.8Ghz
 - Supports GPS/BDS/GLONASS/Galileo navigation satellite signal simulation
- **Accurate Identification:** Can detect over 400 drone models and their IDs with accurate UAV model identification and unique electronic fingerprints.
 - **Black And White List:** The same direction, the same frequency band, the same brand, and the same type of UAV can be listed in black and white.
 - **Unmanned Guard:** 24 hours unmanned-guard, automatic jamming trustless drones. C2/GNSS can be selected.

Detection
10 Km

Jamming
1-2 Km

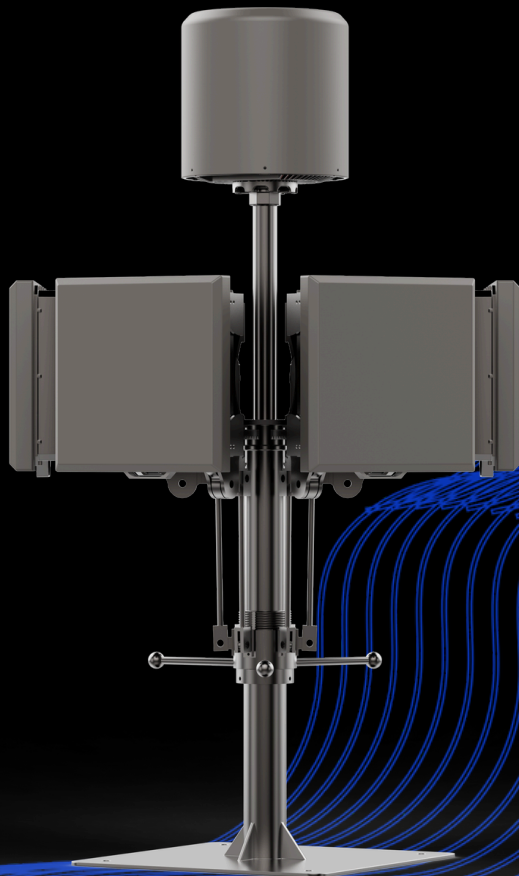

Spoofing
3 Km

IP 65

HOBIT SJ

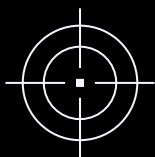

Counter-UAV Stationary Solution with six sector directional Jamming

Key Features:

- 10KM Detection Range
- 70MHz-6GHz Frequency Supported
- 300Mhz-6Ghz FPV analog signal detection
- DroneID and RemoteID supported
- Black And White List Based On Finger Print
- Reliable Detection With High Accuracy (99%)
- Detection $\geq$ 400 Different UAV Models
- Six sector directional Jammer, range up to 3km. can be customized

- **Accurate Identification:** Can detect over 400 drone models and their IDs with accurate UAV model identification and unique electronic fingerprints.
- **Black And White List:** The same direction, the same frequency band, the same brand, and the same type of UAV can be listed in black and white.
- **Unmanned Guard:** 24 hours unmanned-guard, automatic jamming trustless drones. C2/GNSS can be selected.

Detection
10 Km

Jamming
3 Km

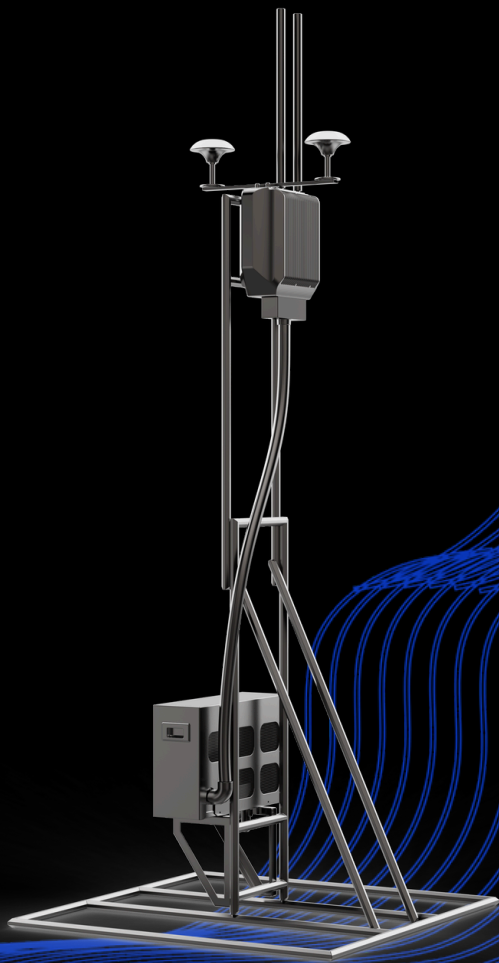

IP 65

AEROSEEK

HOBIT SP1

GNSS Spoofing Device

Key Features:

- Maximum operating distance: $\geq 30\text{km}$
 - Maximum operating height: $\geq 10\text{km}$
 - Power adjustment range: 80dB
 - Supports GPS, BDS, GLONASS, Galileo, maximum 23bands.
 - RF total power: $\geq 350\text{w}$ (1.2CH $\geq 200\text{w}$, 1.6CH $\geq 200\text{w}$)
 - Navigation satellite signal synchronization time: $< 240\text{s}$
 - Power on start-up time: 40s;
- It can perform navigation deception on unmanned aerial vehicles that rely on satellite navigation positioning systems
 - Support external direction finding module to identify target orientation
 - Support external commands to control the combination and transmission of any navigation signal

Spoofing
30Km

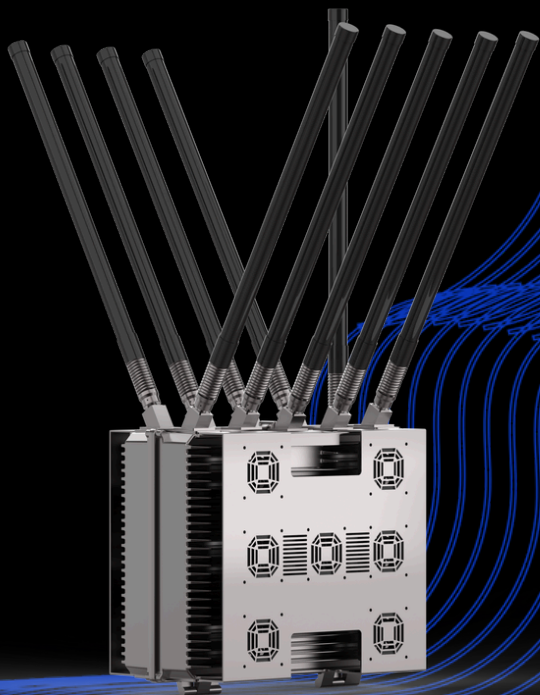

IP 65

AEROSEEK

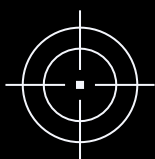

HOBIT FJ

Automatic Counter FPV Solution

Key Features:

- 2KM Detection Range
 - 700MHz-6.2GHz Frequency Supported
 - FPV analog signal detection
 - 9 bands jamming
 - Jamming range up to 2km
 - Power Consumption: 400W
- **Fully automatic:** Automatically initiates counter-drone jamming upon detecting a FPV, requiring no manual operation.
 - **Detection:** Compatible with drones (700MHz-6.2GHz), including FPV models.
 - **9 bands Jamming:** 433Mhz, 900Mhz, 1.2Ghz, 1.5Ghz, 2.4Ghz(Dual module), 5.2Ghz, 5.8Ghz(Dual module).

Detection
